ADAM: same input, different realised injury
Body reward, health 300
Body reward, health 3
Social reward, both healths
Zero reward
Selected-action probability change (pp)
Optimizer steps (forced diagnostic action)
SGD: same input, different realised injury
Selected-action probability change (pp)
Optimizer steps (forced diagnostic action)
First decision after the reward update
Policy total variation at turn 9 (%)
61151 m0
61151 m1
61152 m0
61152 m1
61153 m0
61153 m1
61154 m0
61154 m1
Same first 8 transitions and turn-9 input
First actual choice that differed across rewards
First different actual action (turn)
Both agents were alive at the time of choice
